A320 Family Immersion is a package that includes several visual effects for the Aerosoft Airbus A318/A319 and Airbus A320/A321.

FSFX Packages brings a new way to simulate sparkling new effects around the different aircrafts and sceneries under interesting environmental conditions. Since Microsoft Flight Simulator X and Lockheed Martin's Prepar3D don't come bundled with such realistic effects, we had to think out of the box and create a new sense of immersion. In addition to our generic package, and since every aircraft and scenery is different, we decided to develop specific packages for add-ons. This allows us to push the boundaries of what's never been seen before in terms of visual effects!

A320 Family Immersion is by far one of the most advanced aircraft-specific effects package ever made! A320 Family Immersion offers a vast selection of effects found on the real A320 aircraft. FSFX Packages newest product will bring new and innovative condensation effects, impressive lighting effects, and other brilliant additions that have never been done for Flight Simulator X and Prepar3D. A320 Family Immersion will bring your flight simming experience to new heights and add realism for both, flight deck pilots and enthusiasts alike. We are proud to release our brand new effects package featuring the Aerosoft Airbus Family A320. The Airbus A320 Family is one of the most popular series of aircrafts around the world and we are glad to provide it with the utmost quality effects on the market! Experience flight like you've never done it before! We hope you'll love the product as much as we had fun creating it!

A320 Family Immersion includes the following features:

- outstanding multi-stage engine condensation
- amazing multi-stage wing condensation
- 3D multi-stage engine nacelle's lift vanes condensation
- realistic multi-stage custom contrails which are regulated by weather variables
- remarkable water vortex from the ground into the engine
- great water and snow vortices at wingtips upon rotation
- volumetric navigation, beacon, strobe, and logo light under fog, mist, and low visibility conditions
- volumetric landing and taxi lights under fog, mist, and low visibility conditions
- landing and taxi lights fade-in and fade-out
- new touchdown effect
- new engine start-up smoke under cold conditions
- brake dust effect when retracting the landing gear
- enhanced wheel effects under rain and snow conditions
- enhanced multi-stage engine jet wash effects under rain and snow conditions
- impressive engine jet wash effects with reversers under rain and snow conditions

## **Wing condensation**

Take the most out of a foggy morning departure with A320 Family Immersion! Imagine flying out of Zurich with your favorite Airbus' wing full of condensation! This is A320 Family Immersion! Our awe-inspiring wing condensation will truly give pilots a sense of the greatness of lift!

## **Engine condensation**

Feel the thrust of your engines with FSFX Packages' custom-made engine condensation, exclusively tailored for the A320 Family! Experience unique engine condensation effects for the A320 Family. Quality effects as seen in the videos of greatest YouTube's Flight Sim videographers!

## **Jet wash**

Do you know what is as cool as engine condensation when thrust is applied? The end result! Jet wash effects with A320 Family Immersion have been greatly enhanced and provide a very realistic environment around the aircraft! A320 Family Immersion jet wash effects will aggrandize the power of your A320 engines!

## **Contrails**

A320 Family Immersion provides the world's most advanced contrails depiction ever, highlighting a set of custom-made contrails that fits the A320 Family right on! No more flat and dull contrails for your A320 Family aircrafts with A320 Family Immersion! Higher contrasts, higher resolution and hence, A320 Family Immersion is a synonym of happier high flyers!

## **Volumetric lighting**

When we crafted this feature for the A320 Family Immersion, we were astounded! We were speechless before such a sight! Volumetric lighting on the A320 Family looks awesome! It is as if A320 Family Immersion gave the A320 Family a perfect combination between a light show and arts in foggy and misty conditions. Early morning departures will never look the same with volumetric lighting!

## **+ many other effects**

New touchdown effect for your hard landings, new engine start-up smoke under cold conditions and new brake dust effect when retracting the landing gear! Water vortex from the ground into the engine, and upon rotation, water vapour vortices under each wingtip.

## **Simple installation**

A320 Family Immersion comes with an easy to use Install Utility, automatically installing user selected effects on your Aerosoft Airbus A318/A319 and Airbus A320/A321 aircraft on FSX, FSX:SE and P3D v2.5.

Since some of you already have custom contrails or other effects installed, we give you the choice to keep or disable them on the aircraft upon installation. We highly suggest trying ours before making that decision.

## **Performance at first**

After many years of flying in the community, it was clear from the start that performance was going

to be an important factor for the success of this product. Therefore, after several hundreds of hours testing with some of the big names of the community, we think we have reached the perfect balance between beauty, memory usage and framerate.

A318/A319 and A320/A321

A320 Family Immersion works for both, Aerosoft Airbus A318/A319 and/or Aerosoft Airbus A320/A321.

### **Works for you**

A320 Family Immersion is compatible with all popular texture enhancement add-ons and weather engines available for Microsoft Flight Simulator X and Lockheed Martin Prepar3D. If you fly in FSX with DirectX 10 enabled, you must convert newly installed A320 Family Immersion effects using SteveFX's DX10 Scenery Fixer.

### **Ready for capture**

Our goal with this product is to extract the beauty of the weather interacting with the aircraft and bring those effects to flight simmers. While doing so, we optimized every effects to make the job easier for virtual photographers and video producers. Visual effects can be displayed in a slow motion environment without spreading apart like they usually do with default effects, making it ideal for today's Flight Sim recording techniques.

A320 Family Immersion is the third product signed FSFX Packages. The positive feedback received from both PrecipitFX and 777 Immersion represents a sign of quality, which is also present in A320 Family Immersion. 777 Immersion is a must-have for all 777 pilots and A320 Family Immersion is therefore a must-have for all A320 Family pilots.

FSFX Packages is committed to work their products up to first-class Flight simulator add-ons. The team hereby works on several anticipated products for the Flight simulator community, which will bring a very much needed realistic touch, signed FSFX Packages.
