

## **Equipment Level of Detail Radius**

This file increases the radius where the high-detail version of the equipment models are loaded.  
*(It should only be used if the low-detail version of the equipment model fades away before the high detail version is loaded!)*

Since these models increase the radius where the high detail models are loaded performance could be affected.

### **How to install**

Open the folder ***"Increased LOD radius"***

Copy the file "EDDK\_Library\_Equipment.BGL" and paste it into the

"...\Cologne-Bonn Professional\Scenery" folder

Overwrite the old file.

### **Restore default settings**

Open the folder ***"Original LOD radius"***

Copy the file "EDDK\_Library\_Equipment.BGL" and paste it into the

"...\Cologne-Bonn Professional\Scenery" folder

Overwrite the old file.
