NORTH AMERICA IFR

User Guide

Add-on for

Introduction

NORTH AMERICA IFR have been created to be used with exclusively with Microsoft Flight Simulator.

The archive you have downloaded contain the following files:
- **NORTH AMERICA IFR User Guide** * the document you are reading;
- **Community.zp** * the archive with Missions Pack and new livery for the default Airbus A320.

System requirements

NORTH AMERICA IFR does not requires any additional equipment. The product be used with the same requirements to run Microsoft Flight Simulator.

A running copy of Microsoft Flight Simulator installed on your Pc is required in order to use the product, as well!

However, here is a list of minimum requirements:

- Microsoft Windows 10 with last updates
- Microsoft Flight Simulator (Standard, De Luxe and Premium)
- CD-ROM drive (for boxed version)
- 400 MB of free disk space
- Adobe Acrobat Reader 6 or higher to read and print the manual (1)

(1) Available for free; download it at http://www.adobe.com

Installation

To install the product on your Personal Computer:

1) **Open the Community.zip** file and **extract** the content into your **Flight Simulator Community Folder**.

Note: Y**ou must choose the correct path manually, browsing the folder on your Pc.**

That why the Microsoft Flight Simulator's "Community" folder is located in dependance of your own settings and Version installed.

The Path should be something like this below:

For the Windows Store install:
C:\Users\[Your User Name]\AppData\Local\Packages\
Microsoft.FlightSimulator_8wekyb3d8bbwe\LocalCache\Packages\Community

For the Steam install:
C:\Users\[Your User Name]\AppData\Local\Packages\
Microsoft.FlightDashboard_8wekyb3d8bbwe\LocalCache\Packages\Community

NOTE: Windows 10 by default hides the "AppData" folder, so before installing, you will have to go to "View" in the menu of File Explorer, and select show "Hidden items" so as to see it.

Be sure to install into the correct folder!

In this manner all files will be copied into the appropriate subfolder..

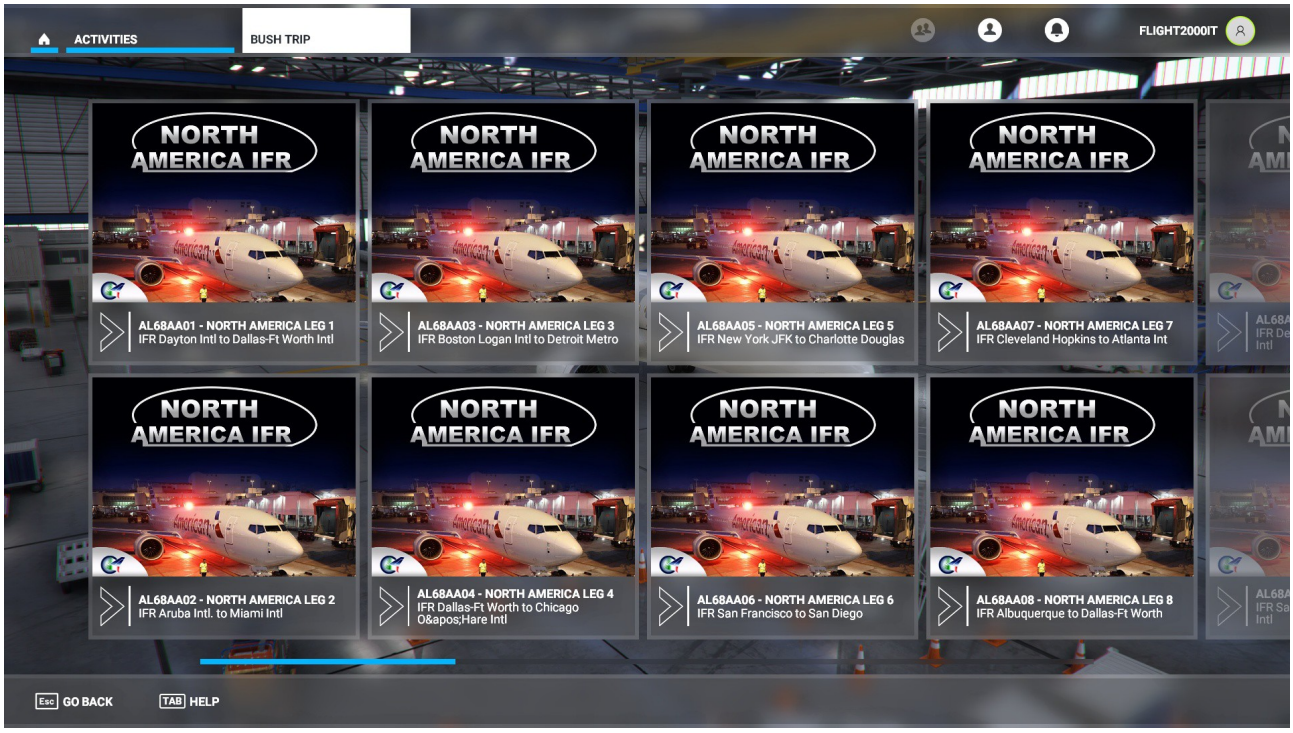
Support

To obtain technical support, go to **http://www.fs2000.org/product-support/** indicating:

- Order number
- Product Title
- Flight Simulator Version
- Problem in detail

Also, do not simply write 'The product does not work' but explain us clearly your problem, so we can help you better and faster.

NORTH AMERICA IFR



NORTH AMERICA IFR is a first attempt to let you fly an IFR mission making up for the Microsoft Flight Simulator lack. Missions are available into the **ACTIVITIES/BUSH TRIP** but they work in conjunction with the ATC engine. So you can interact with the Traffic Control to simulate real life flight operations. So, test your knowledge and skills in this particular aspect of the flight.

You start each mission with the plane parked at the gate, cold & dark, so you have the complete control and responsibility of any aspect of the planned route.

In addition, the missions take advantage of the Microsoft TTS technology and you will receive instructions and information about the flight by voice.

NOTE: The Microsoft TTS engine is very unstable. If you do not receive the welcome message at the begin of each leg, please restart the mission.

Product Feature:

- **Fleet** – new livery in American Airlines colors for the default Airbus A320neo in ultra high 8k resolution. You can use the provided plane or any already in your fleet.
- **Missions** – 10 IFR flights completely integrated with the ATC system, with Speed call, Stall and Overspeed monitoring and warnings, Gear, Flaps and altitude check and more. Fly for hours in a large range of scenarios and enjoy a most realistic flight experience in a real aeronautical world ambience.

- **Custom Settings** – You can fly the missions with preset settings or change weather, season, date and time. You can refuel the plane in any time and you have full access to Checklists and Assistance Options. Multiplayer feature is also enabled, so you can fly online with your friends.
- **Complete Documentation -** In addition to a useful **User Guide**, **p**roduct includes the most recent and official AIP documentation (Airport, Arrival, Approach, Departure) for all destination Airport.

Mission List:

- AA01 – Dayton Intl to Dallas-Ft Worth Intl
- AA02 – Aruba Intl. to Miami Intl
- AA03 – Boston Logan Intl to Detroit Metro
- AA04 – Dallas-Ft Worth to Chicago O'Hare Intl
- AA05 – New York JFK to Charlotte Douglas
- AA06 – San Francisco to San Diego
- AA07 – Cleveland Hopkins to Atlanta Int
- AA08 – Albuquerque to Dallas-Ft Worth
- AA09 – Denver Intl to Phoenix Sky Harbor Intl
- AA10 – Salt Lake City Intl to Los Angeles Intl

AIP Charts

You can access at the official charts and map for all airports included in the mission pack:

- Dayton Intl KDAY
- Dallas-Ft Worth Intl KDFW
- Aruba Intl. TNCA
- Miami Intl KMIA
- Boston Logan Intl KBOS
- Detroit Metro KDTW
- Chicago O'Hare Intl KORD
- New York JFK KJFK
- Charlotte Douglas KCLT
- San Francisco Intl KSFO
- San Diego Intl. KSAN
- Cleveland Hopkins KCLE
- Atlanta Int KATL
- Albuquerque KABQ
- Denver Intl KDEN
- Phoenix Sky Harbor Intl KPHX
- Salt Lake City Intl. KSLC
- Los Angeles Intl. KLAX

Into The Cockpit

The mission begins with the plane parked cold and dark. Preliminarily, choose the desired flight options from the **MSFS Bar Menu**:

- We suggest you to choose **Live Weather** for the maximum realism.
- Set date and time of the flight.
- Choose the desired fuel and payload options

To begin the mission execute the necessaries flight controls and checklists, then when you are ready, contact Clearance or Ground (that depends by the Airport) to receive the IFR clearance.

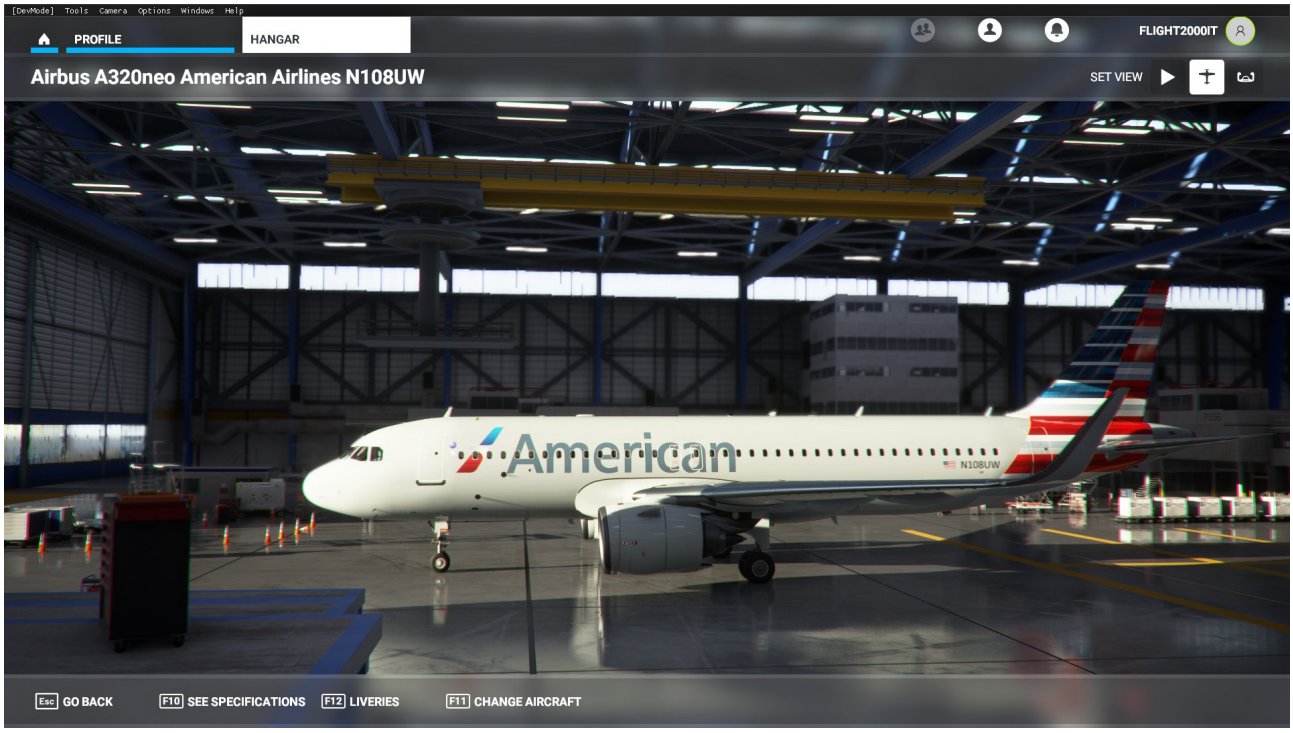
The flightplan is preloaded in your FMC and you can display it in any time in the NAVLOG too.

Follow instructions received by the Controller to progress in your flight and observe how the mission interact with the ATC.

After landing at the destination Airport you will receive the COMPLETED message and the mission will end.

The Airbus A320neo American Airlines

Product also includes New livery for the default Airbus A320neo in American Airlines colors with **exterior** and **interior** textures in **ultra high 8k resolution**.



How To Use Your Own Plane In Missions

Although Microsoft doesn't allow you to change planes during a Bush Trip mission, there is an easy way around this limitation

1) Go in **Option/General** menu
2) Activate **DEVELOPER MODE**
3) A new menu will appear in the upper window
4) Click on **Windows** menu item, then on **Aircraft Selector**

It's All!
