

TaD – Green Falls

Hello!

First of all we'd like to say thank you for the purchase of one of our high quality products. We hope that you will enjoy our work just like we did while creating our product for you.

Since the days of Railworks and later Trainsimulator 2012 we've been creating scenarios for your simulation experience. Trains and Drivers has a growing and satisfied customership and we hope you'll be part of this great community, too.

Sincerely,

Andreas Czudai

Support:

In case you need support for one of our products, please make sure that you include as many informations, screenshots (if possible) and exact details about the issue you have to make sure we can provide fast help!

Please send any support issues to: info@trains-and-drivers.net

Thank you!

System Requirements for this product:

- **Trainsimulator 2013**
- **US Community Asset Pack**

optional:

- **ALCO RS-11 LV (TaD)**
- **LV Freight Pack (TaD)**
- **PRR Freight Pack (TaD)**
- **Modern US Freight (TaD)**
- **GP-9 (RSC.com)**
- **SW 1500 (RSC.com)**
- **GE UP 44 Tonner (RSC.com)**

The listed addons (routes, rollingstock, engines, etc.) are not part of this product and may be purchased seperately.

Installation:

- Double-click the unzipped .exe-file provided with your download.
- Choose your language
- Follow the instructions from the installation program.

Note: The installer tries to install your addon into the default installation position of Trainsimulator 2013 which normally resides in the following folder: „DriveName\Steam\steamApps\common“.

If your Steam installation is not located at *the default place*, you will have to enter the correct path to your „railworks“ folder manually.

Examples:

- C:\Steam\steamApps\common\railworks
- E:\Games\Steam\steamApps\common\railworks
- K:\MyGames\Steam\steamApps\common\railworks
- G:\Steam\steamApps\common\railworks

(These examples may not reflect the path used on your specific computer system)

In case the entered path is wrong, the installation will ask for a new folder to be created, in this case click „No“ as this indicates that your program will not be installed properly.

Deinstallation:

If you ever need to uninstall your program, you may follow these instruction:

- Click on the Windows Icon in your taskbar
- Choose: All Programs
- Select the Trains and Drivers Folder
- Click on the uninstaller-icon

Playing your new scenarios in Trainsimulator 2013:

When you start Trainsimulator 2013 you will be in your „Collection“ by default. But where are your new scenarios? Did something go wrong during the installation? - No, normally this has not happened (if you carefully followed the provided installation instructions :-))

Q: "So, where are the new scenarios then?"

A: „You will find them in the singleplayer mode. Click on „Mainmenu“ (lower right corner of the screen) and then click on „Singleplayer“. Select „Standard Scenarios“, choose your route and you will see all the scenarios you have installed.“

Possible errors:

The scenario fails to load and shows an error message saying:

„Can´t load railvehicle XYZ...“

This has something to do with your installed rollingstock. If you don´t match the requirements of the addon and rollingstock is missing, you will see this error message.

In some cases this is just a cache problem which can be solved by clearing the cache of the game:

Mainmenu/Gamesettings/Tools/Clear Cache

„Something bad has happened“

This error seems to have many reasons :-)

But you should do the following to keep you away from this error:

- *Make sure your game and addons are installed properly*
- *Clear the cache if needed*
- *Verify gamefiles via Steam from time to time*
- *Do not try to edit a scenario and try to run it afterwards.*

Scenario listing:

Freeroam Szenarien:

- US Equipment (US community asset pack)
- UK Equipment (EU community asset pack)
- German Equipment (EU community asset pack)
- Alco RS 11 LV
- Alco RS 11 LV + Modern US Freight

Standard Scenarios:

US Community Asset Rolling Stock:

[US Assets](#) - Evening Switcher

New deliveries have arrived! Break down the consist on Interchange Yard 1 and deliver the cars to the correct sidings.

[US Assets](#) - Sorting things out

You will swap cars between the Interchange and the Switching yard.

[US Assets](#) - Easy job

Some of the local industries have demanded transports for tomorrow. You will collect the cars from the industrial sidings before placing them all on Switching Yard 1.

[US Assets](#) + [Modern US Freight](#) - Midnight duties:

Tonight you'll have some easy shunting jobs to do before you can go home and take a rest.

Alco RS 11 LV:

1. [Alco RS11 LV](#) + [LV Pack](#) – Flour deliveries

The Flour Mill needs new supplies. It's your job to swap the empty and full cars in the yard and to deliver all cars to the correct sidings.

2. [Alco RS11 LV](#) + [LV Pack](#) Early Morning Switching

It's Monday Morning and many industries in Green Falls have requested the railroad's services. This is a challenging freestyle switching scenario, in which you'll be given your work order at the beginning -- how and in what order you complete it is up to you!

3. [Alco RS11 LV](#) + [PRR Pack](#) - Boxcars Out!

In this easy scenario, you will collect several boxcars and assemble them at the Switching Yard.

US Community Asset Pack and GP9 or SW1500 UP Addon:

4. [GP9](#) + [US Assets](#) - Evening Switcher / 4a. [SW 1500](#) + [US Assets](#) - Evening switcher

New deliveries have arrived! Break down the consist on Interchange Yard 1 and deliver the cars to the correct sidings.

5. [GP9](#) + [US Assets](#) Sorting things out / 5a. [SW 1500](#) + [US Assets](#) Sorting things out

You will swap cars between the Interchange and the Switching yard.

6. [GP9](#) + [US Assets](#) - Easy job / 6a. [SW 1500](#) + [US Assets](#) - Easy job

Some of the local industries have demanded transports for tomorrow. You will collect the cars from the industrial sidings before placing them all on Switching Yard 1.

GE 44 Tonner UP:

7. [GE 44 Tonner UP](#) - Winter's day

Easy shunting job on a winter's day

8. [GE 44 Tonner](#) + [Modern US Freight](#) - Midnight duties

Tonight you'll have some easy shunting jobs to do before you can go home and take a rest.
