

Hello!

First of all we'd like to say thank you for the purchase of one of our high quality products. We hope that you will enjoy our work just like we did while creating our product for you.

Since the days of Railworks and later Trainsimulator 2012 we've been creating scenarios for your simulation experience. Trains and Drivers has a growing and satisfied customership and we hope you'll be part of this great community, too.

Sincerely,

Andreas Czudai

Support:

Please post your **support issues** on our forums, so that other users may take advance from the questions and answers. Thank you!

System Requirements:

- **Trainsimulator 2013**
- **Western Lines of Scotland**
- **EU Community Assets**
- **Class 111 Addon**

Installation:

- Double-click the unzipped .exe-file provided with your download.
- Choose your language
- Follow the instructions from the installation program.

Note: The installer tries to install your addon into the default installation position of Trainsimulator 2013 which normally resides in the following folder: „DriveName\Steam\steamApps\common”.

If your Steam installation is not located at the default place, you will have to enter the correct path to your „railworks” folder manually.

Examples:

- *C:\Steam\steamApps\common\railworks*
- *E:\Games\Steam\steamApps\common\railworks*
- *K:\MyGames\Steam\steamApps\common\railworks*
- *G:\Steam\steamApps\common\railworks*

(These examples may not reflect the path used on your specific computer system)

In case the entered path is wrong, the installation will ask for a new folder to be created, in this case click „No“ as this indicates that your program will not be installed properly.

Deinstallation:

If you ever need to deinstall your program, you may follow these instruction:

- Click on the Windows Icon in your taskbar
- Choose: All Programs
- Select the Trains and Drivers Folder
- Click on the uninstaller-icon
-

Playing your new scenarios in Trainsimulator 2013:

When you start Trainsimulator 2013 you will be in your „Collection“ by default. But where are your new scenarios? Did something go wrong during the installation? - No, normally this has not happened (if you carefully followed the provided installation instructions :-))

Q: "So, where are the new scenarios then?"

A: „You will find them in the singleplayer mode. Click on „Mainmenu“ (lower right corner of the screen) and then click on „Singleplayer“. Select „Standard Scenarios“, choose your route and you will see all the scenarios you have installed.“

Possible errors:

The scenario fails to load and shows an error message saying:

„Can´t load railvehicle XYZ...“

This has something to do with your installed rollingstock. If you don´t match the requirements of the addon and rollingstock is missing, you will see this error message.

In some cases this is just a cache problem which can be solved by clearing the cache of the game:

Mainmenu/Gamesettings/Tools/Clear Cache

„Something bad has happened“

This error seems to have many reasons :-)

But you should do the following to keep you away from this error:

- *Make sure your game and addons are installed properly*
- *Clear the cache if needed*
- *Verify gamefiles via Steam from time to time*
- *Do not try to edit a scenario and try to run it afterwards.*

The Scenarios:

This pack brings you seven new scenarios for the Western Lines of Scotland: Port Road Addon featuring the first generation diesels of the British Railways.

Featured engines in these scenarios:

- **Class 111**
- **Class 37**
- **Class 43**
- **Class 55 Deltic**

Scenario listing:

1. Goods to Dumfries

Collect the needed wagons at Castle Douglas, load your train and take it to Dumfries.

2. TPO to London

You will drive an early morning TPO from Stranraer to Newton Stewart where the next coaches are added and another crew takes over.

3. Express to Carlisle

Today you will drive the evening train from Stranraer to Carlisle.

4: Down to the harbour

You will take a mixed freight from Newton Stewart to Stranraer Harbour.

5. Passenger train to Dumfries

A stopping run with one of the new DMUs from Carlisle to Dumfries. The weather isn't very good today and it won't change during your run.

6. Stopping train to Kirkcubright

Drive the Class 111 from Castle Douglas to Kirkcubright and back to Castle Douglas again. It's a very beautiful evening here.

7. Dumfries to Stranraer Harbour

Drive the express from Dumfries to Stranraer Harbour service with an intermediate stop at Castle Douglas.
