

TaD BasicLine: ECML in the early 1980s

Hello!

First of all we'd like to say thank you for the purchase of one of our high quality products. We hope that you will enjoy our work just like we did while creating our product for you.

Since the days of Railworks and Trainsimulator 2012 we've been creating scenarios for your simulation experience. Trains and Drivers has a growing and satisfied customership and we hope you'll be part of this great community, too.

Sincerely,

Andreas Czudai

-Trains and Drivers-

Thank you!

SYSTEM REQUIREMENTS

[Trainsimulator 2014](#)

[Creative Rails East Coast Mainline Part II](#)

[European Loco and Asset Pack](#)

The listed addons (routes, rollingstock, engines, etc.) are **not part of this product** and may be purchased separately. You will find more information about how to purchase these addons by visiting our website. The product site of this addon holds a list with all needed addons. (Select the tab named: System Requirements) This list is hyperlinked so you can jump directly to the website of the selected addon by clicking on it's name. **Note that Trains and Drivers is not responsible for the availability of any linked website and we cannot support any 3rd party products.**

INSTALLATION

- Download your product using the downloadlink provided in your eMail
- Unzip the .zip-file into a place where you can easily access it. We recommend unzipping it to your desktop.
- Double-click the unzipped .exe-file provided with your download.
- Choose your language for the installation. The language setting you use here is not affecting the language settings of the scenarios or Trainsimulator 2014, this selection is only valid for the installation process itself.
- Follow the instructions during the installation program runs.

Note: The installer tries to install your addon into the default installation position of Train-simulator 2014. Trainsimulator 2014 normally resides in the following folder:

„DriveName:\Steam\steamApps\common“.

If your Steam installation is not located at the default place, you will have to enter the correct path to your „railworks“ folder manually.

Examples:

- C:\Steam\steamApps\common\railworks
- E:\Games\Steam\steamApps\common\railworks
- K:\MyGames\Steam\steamApps\common\railworks
- G:\Steam\steamApps\common\railworks

(These examples may not reflect the path used on your specific computer system)

In case the entered path is not correct, the installation will ask for a new folder to be created, in this case click „No“ as this indicates that your program will not be installed properly. Enter the correct railworks path instead.

DEINSTALLATION

If you ever need to uninstall your program, follow these instruction:

- Click on the Windows Icon in your taskbar
- Choose: All Programs
- Select the Trains and Drivers folder
- Click on the uninstaller-icon of the product you want to uninstall.

YOUR SCENARIOS IN TRAINSIMULATOR 2014

When you start Trainsimulator 2014, you will see the main menu. Select „DRIVE“ and then „STANDARD“. You can now choose from all routes you have installed. Select the route you want to drive on and on which you have installed Trains and Drivers scenarios.

You will see a list with all scenarios that are available for this route. The Trains and Drivers scenarios are named in this scheme: „TaD – product name – scenario name“

You can also drive the scenarios of this product using your career mode. Select „DRIVE“ and „CAREER“, then your route and the scenario you want to drive.

TROUBLESHOOTING

- The scenario fails to load and shows an error message saying:

„Can´t load railvehicle XYZ...“

This has something to do with your installed rollingstock. If you don´t match the requirements of the addon and rollingstock is missing, you will see this error message.

In some cases this is just a cache problem which can be solved by clearing the cache of the game:

Main menu/Game settings/Tools/Clear Cache

THE SCENARIOS

- **TaD 1. High Speed Power (55mins, medium)**

Take command of an Intercity 125 from Doncaster to Peterborough, with a stop at Grantham on the way.

- **TaD 2. Intercity with extra stops (55mins, medium)**

Drive an Intercity from Peterborough to Doncaster. Due to the high passenger density you will perform stops at every station along the way.

- **TaD 3. Southbound Deltic (60mins, medium)**

Drive the southbound stopping train hauled by a Class 55 Deltic from Doncaster to Peterborough.

- **TaD 4. Through the snow (70mins, medium)**

Drive an Intercity on a non-stop service from Peterborough to Doncaster.

- **TaD 5. The Parcel Train (90mins, medium)**

Drive a parcel train from Doncaster to the terminal at Peterborough.

- **TaD 6. Night Freight (75mins, medium)**

Night freight from Peterborough to Doncaster.

- **TaD 7. Shunting Time (50mins, hard)**

Today you will perform some shunting activities around Doncaster.

LICENSE AGREEMENT

You may use our products on your home computer system and you are allowed to make a backup-copy for your own personal use.

You may not: distribute, sell or share our products without permission from Trains-and-Divers.

We do our best to make sure that our products will run properly on our customers systems, but because of the variety of system configurations, AddOns installed and software running on our customers systems, we cannot guarantee that our product will run smoothly on every computer. When installing our products, you accept that we are not responsible for any form of damage caused by using our products. We have the right to change, update or delete parts of the product at any time.
