Trains and Drivers Railtour 2001
# Class 57 Rail Tour

Scenariopack for RSC´s Trainsimulator 2013

System Requirements:

- **Trainsimulator 2013**
- **Class 57 Rail Tour**
- **ECML**
- **Great Western Mainline**
- **London – Brighton**

Hello!

First of all we´d like to say thank you for the purchase of one of our high quality products. We hope that you will enjoy our work just like we did while creating our product for you.

Since the days of Railworks and later Trainsimulator 2012 we´ve been creating scenarios for your simulation experience. Trains and Drivers has a growing and satisfied customership and we hope you´ll be part of this great community, too.

Sincerely,

Andreas Czudai

-Trains and Drivers-

Installation:

- Double-click the unzipped .exe-file provided with your download.

- Choose your language

- Follow the instructions from the installation program.

Note: The installer tries to install your addon into the default installation position of Trainsimulator 2013 which normally resides in the following folder: *„DriveName\:Steam\steamApps\common"*.

If your Steam installation is not located at *the default place, you will have to enter the correct path to your „railworks" folder manually.*

Examples:

- *C:\Steam\steamApps\common\railworks*
- *E:\Games\Steam\steamApps\common\rail works*
- *K:\MyGames\:Steam\steamApps\common\ railworks*
- *G\:Steam\steamApps\common\railworks*

(These examples may not reflect the path used on your specific computer system)

In case the entered path is wrong, the installation will ask for a new folder to be created, in this case click „No" as this indicates that your program will not be installed properly.

Deinstallation:

If you ever need to deinstall your program, you may follow these instruction:

- Click on the Windows Icon in your taskbar
- Choose: All Programs
- Select the Trains and Drivers Folder
- Click on the uninstaller-icon
-

Playing your new scenarios in Trainsimulator 2013:

When you start Trainsimulator 2013 you will be in your „Collection" by default. But where are your new scenarios? Did something go wrong during the installation? - No, normally this has not happened (if you carefully followed the provided installation instructions :-))

Q:"So, where are the new scenarios then?"

A: „You will find them in the singleplayer mode. Click on „Mainmenu" (lower right corner of the screen) and then click on „Singleplayer". Select „Standard Scenarios", choose your route and you will see all the scenarios you have installed."

Possible errors:

The scenario fails to load and shows an error message saying:

„Can´t load railvehicle XYZ..."

This has something to do with your installed rollingstock. If you don´t match the requirements of the addon and rollingstock is missing, you will see this error message.

In some cases this is just a cache problem which can be solved by clearing the cache of the game:

Mainmenu/Gamesettings/Tools/Clear Cache

„Something bad has happened"

This error seems to have many reasons :-)

But you should do the following to keep you away from this error:

- *Make sure your game and addons are installed properly*
- *Clear the cache if needed*
- *Verify gamefiles via Steam from time to time*
- *Do not try to edit a scenario and try to run it afterwards.*

The Scenarios:

This pack brings you six new scenarios for the Sherman Hill route addon. No extra downloads required to run them. Just enter the cab, blow the whistle, and here we go ...

Featured engines in these scenarios:

- **Class 57**

Scenario listing:

Scenario 1: Brighton - London
After a luxury weekend in one of Brightons best hotels, the railtour is about to head out to London where the travellers will visit the Tower, Mme Tussauts and a musical in the evening. Your train has been brought to the station and you are beginning this joureney by setting up your engine.

Scenario 2: Paddington - Oxford
The second leg of the tour leads to Oxford where the travellers will spend another 2 days visting the famous universities and the Christ Church Cathedral.You will take the train from London Paddington Station to Oxford. The weather is typical for this season. So expect a bit rain on your run to the north.

Scenario 3: Oxford - Paddington
This leg goes non-stop from Oxford to London and continues to Brighton.

Scenario 4: Clapman Junction - Brighton
The last leg of 2001´s railtour brings you and your passengers back from London to Brighton. Starting at Clapham Junction you will take the train down south where the scenario and this railtour will end.

Scenario 5: York - Newcastle
Having travelled up from London you are starting your trip at York. You will bring your train non-stop to Newcastle where the travellers will visit a charity concert held by the Dire Straits in Mark Knopflers hometown.

Szenario 6: York - Newcastle
The concert was a great success. Although it is early in the morning you must bring your passengers safely back to London. You will go as far as York where the next crew will take over.
