

TaD – German Commuters – Pro Line Scenariopack

Hello!

First of all we´d like to say thank you for the purchase of one of our high quality products. We hope that you will enjoy our work just like we did while creating our product for you.

Since the days of Railworks and later Trainsimulator 2012 we´ve been creating scenarios for your simulation experience. Trains and Drivers has a growing and satisfied customership and we hope you´ll be part of this great community, too.

Sincerely,

Andreas Czudai

Support:

In case you need support for one of our products, please make sure that you include as many informations, screenshots (if possible) and exact details about the issue you have to make sure we can provide fast help!

Please send any support issues to: info@trains-and-drivers.net

Thank you!

System Requirements for this product:

- **Trainsimulator 2013**
- **Cologne – Dusseldorf (Steam)**
- **Munich – Augsburg (Steam)**
- **ICE 1 (Steam)**
- **ICE 3 (Steam)**
- **vr BR 111 + DoSto Coaches red**

The listed addons (routes, rollingstock, engines, etc.) are not part of this product and may be purchased seperately.

Installation:

- Double-click the unzipped .exe-file provided with your download.
- Choose your language
- Follow the instructions from the installation program.

Note: The installer tries to install your addon into the default installation position of Trainsimulator 2013 which normally resides in the following folder: „DriveName\Steam\steamApps\common“.

If your Steam installation is not located at *the default place*, you will have to enter the correct path to your „railworks“ folder manually.

Examples:

- `C:\Steam\steamApps\common\railworks`
- `E:\Games\Steam\steamApps\common\railworks`
- `K:\MyGames\Steam\steamApps\common\railworks`
- `G:\Steam\steamApps\common\railworks`

(These examples may not reflect the path used on your specific computer system)

In case the entered path is wrong, the installation will ask for a new folder to be created, in this case click „No“ as this indicates that your program will not be installed properly.

Deinstallation:

If you ever need to uninstall your program, you may follow these instruction:

- Click on the Windows Icon in your taskbar
- Choose: All Programs
- Select the Trains and Drivers Folder
- Click on the uninstaller-icon

Playing your new scenarios in Trainsimulator 2013:

When you start Trainsimulator 2013 you will be in your „Collection“ by default. But where are your new scenarios? Did something go wrong during the installation? - No, normally this has not happened (if you carefully followed the provided installation instructions :-))

Q: "So, where are the new scenarios then?"

A: „You will find them in the singleplayer mode. Click on „Mainmenu“ (lower right corner of the screen) and then click on „Singleplayer“. Select „Standard Scenarios“, choose your route and you will see all the scenarios you have installed.“

Possible errors:

The scenario fails to load and shows an error message saying:

„Can´t load railvehicle XYZ...“

This has something to do with your installed rollingstock. If you don´t match the requirements of the addon and rollingstock is missing, you will see this error message.

In some cases this is just a cache problem which can be solved by clearing the cache of the game:

Mainmenu/Gamesettings/Tools/Clear Cache

„Something bad has happened“

This error seems to have many reasons :-)

But you should do the following to keep you away from this error:

- *Make sure your game and addons are installed properly*
- *Clear the cache if needed*
- *Verify gamefiles via Steam from time to time*
- *Do not try to edit a scenario and try to run it afterwards.*

Scenario listing:

TaD Commuters - 1. RE 57090 München Hbf to Gessertshausen

Today you will drive the Regional Express from Munchen to Augsburg. Then another driver will take over.

TaD Commuters - 2. RB 57089 Donauwörth to München Hbf

You have to drive this train to its final destination. Start by picking up passengers at Augsburg, then continue your journey.

TaD Commuters - 3. RE 10139 Aachen Hbf to Hamm (Westf)

Drive a RE regional train on the leg between Cologne and Dusseldorf.

TaD Commuters - 4. RE 10507 Emmerich to Koblenz Hbf

A morning Regional Express on the leg between Dusseldorf and Cologne.

TaD Commuters - 5. S Bahn to Holzkirchen

Drive the S3 (Holzkirchen) between Mammendorf and Munchen Hbf.

TaD Commuters - 6. S Bahn to Mammendorf

You take over the train at Munchen Hauptbahnhof. Drive the train until it's final destination, Mammendorf.

TaD Commuters - 7. S Bahn to Köln

You will drive the train until Koln Hauptbahnhof. Normally the S6 line doesn't use the class 423 anymore (the designed EMU is the class 422), but this is a replacement because the scheduled train broke down.

TaD Commuters - 8. S-Bahn to Essen

Today you will drive this S6 train until Dusseldorf where you will be relieved. There are no problems reported.
