Train Simulator 2013
TAD

Hello!

First of all we´d like to say thank you for the purchase of one of our high quality products. We hope that you will enjoy our work just like we did while creating our product for you.

Since the days of Railworks and later Trainsimulator 2012 we´ve been creating scenarios for your simulation experience. Trains and Drivers has a growing and satisfied customership and we hope you´ll be part of this great community, too.

Sincerely,

Andreas Czudai

Support:

In case you need support for one of our products, please make sure that you include as many informations, screenshots (if possible) and exact details about the issue you have to make sure we can provide fast help!

Please send any support issues to: info@trains-and-drivers.net

Thank you!

System Requirements for this product:

- **Trainsimulator 2013**
- **Western Lines of Scotland Addon (STEAM)**
- **WLoS Steam Chapter One (IHH/Ironhorsehouse)**
- **Bonus Content 2 (IHH/Ironhorsehouse)**
- **EU Locomotive and Asset Pack (STEAM)**

The listed addons (routes, rollingstock, engines, etc.) are not part of this product and may be purchased seperately.

Installation:

- Double-click the unzipped .exe-file provided with your download.
- Choose your language
- Follow the instructions from the installation program.

Note: The installer tries to install your addon into the default installation position of Trainsimulator 2013 which normally resides in the following folder: *„DriveName\:Steam\steamApps\common“*.

If your Steam installation is not located at *the default place, you will have to enter the correct path to your „railworks“ folder manually.*

Examples:

- *C:\Steam\steamApps\common\railworks*
- *E:\Games\Steam\steamApps\common\railworks*
- *K:\MyGames\:Steam\steamApps\common\railworks*
- *G\:Steam\steamApps\common\railworks*

(These examples may not reflect the path used on your specific computer system)

In case the entered path is wrong, the installation will ask for a new folder to be created, in this case click „No“ as this indicates that your program will not be installed properly.

Deinstallation:

If you ever need to deinstall your program, you may follow these instruction:

- Click on the Windows Icon in your taskbar
- Choose: All Programs
- Select the Trains and Drivers Folder
- Click on the uninstaller-icon

Playing your new scenarios in Trainsimulator 2013:

When you start Trainsimulator 2013 you will be in your „Collection“ by default. But where are your new scenarios? Did something go wrong during the installation? - No, normally this has not happened (if you carefully followed the provided installation instructions :-))

Q:“So, where are the new scenarios then?“

A: „You will find them in the singleplayer mode. Click on „Mainmenu“ (lower right corner of the screen) and then click on „Singleplayer“. Select „Standard Scenarios“, choose your route and you will see all the scenarios you have installed.“

Possible errors:

The scenario fails to load and shows an error message saying:

„Can´t load railvehicle XYZ...“

This has something to do with your installed rollingstock. If you don´t match the requirements of the addon and rollingstock is missing, you will see this error message.

In some cases this is just a cache problem which can be solved by clearing the cache of the game:

Mainmenu/Gamesettings/Tools/Clear Cache

„Something bad has happened“

This error seems to have many reasons :-)

But you should do the following to keep you away from this error:

- *Make sure your game and addons are installed properly*
- *Clear the cache if needed*
- *Verify gamefiles via Steam from time to time*
- *Do not try to edit a scenario and try to run it afterwards.*

TaD – Pro Line: Scottish Steam

Scenario listing:

TaD Pro Line Steam 1. Parcels to Dumfries
Morning Parcel train from Carlisle to Dumfries

TaD Pro Line Steam 2. Stopping train to Castle Douglas
Drive a local passenger service from Dumfries to Castle Douglas.

TaD Pro Line Steam 3. Postcards from Ireland
The ferry has arrived and there´s a load of parcels and post from Ireland. You will drive a non-stop service down to Castle Douglas where another crew takes over.

TaD Pro Line Steam 4. MOD service Pt 1
Assemble your train at Longtown MOD before heading out to Carlisle Currock.

TaD Pro Line Steam 5. MOD service Pt 2
Second part of the MOD scenario: Drive your train down to Carlisle Currock.

TaD Pro Line Steam 6. Branch Run
Assemble and drive a branchline freight train from Kirkcudbright to Castle Douglas.

TaD Pro Line Steam 7. Night run to Eastriggs
There is an urgent delivery of fuel for Eastriggs MOD. Because of the bad weather you are ordered to take this train there right now, instead of tomorrow morning.

License Agreement / Use of our products:

You may use our products on your home computer system and you are allowed to make a backup-copy for your own personal use.

You may not: distribute, sell or share our products without permission from Trains-and-Drivers.

Important notice:

We do our best to make sure that our products will run properly on our customers systems, but because of the variety of system configurations, AddOns installed and software running on our customers systems, we cannot guarantee that our product will run smoothly on every computer. When installing our products, you accept that we are not responsible for any form of damage caused by using our products.We have the right to change, update or delete parts of the product at any time.
