
TAD – JUST SECML

TRAINS & DRIVERS

TAD – JUST SECML

1. System Requirements:

- Train Simulator by Dovetail Games (Steam)
- SECML Scottish East Coast Mainline Add-On (Just Trains)
- Class 67 Advanced Locomotive Add-On (Just Trains)
- Class 221 Voyager Advanced Add-On (Just Trains)

2. Installation:

Scenarios: Open the installation program and follow the instructions to install the scenario data. The scenarios will appear under: "Drive/Standard Scenarios". Choose your route and select your desired scenario from the list.

- **TaD - Voyager 221 Part 1: To Dundee**

The unit you are driving had some software issues and forced an emergency brake near Edinburgh. Your train has just been repaired after breaking down on the main line. You will be taking the 221 Super Voyager to Dundee making stops along the way.

- **TaD - Voyager 221 Pt. 2: Return to Waverley**

Your unit has been replaced with another Class 221. You will be making the return trip to Waverley making stops at Leuchars, Cupar, Markinch, Kirkaldy, Inverkeithing, and Haymarket along the way.

- **TaD - Commuter services Pt. 1**

Having travelled up from Carstairs you begin your shift near Edinburgh. You will take your train to Waverley and then use the same unit to perform a commuter run to Thornton and Glenrothes. The line behind Rosyth is closed for rebuilding, so only skeleton services are provided. You will perform an extra stop at this station before heading back on the mainline to continue your journey.

- **TaD - Commuter Services Pt. 2**

The second leg of your shift will take you as far as Dundee, going via Perth.

- **TaD - Burntisland Shunting Pt. 1**

Your duty for today is to work on the Burntisland Docks. You will be unloading container cars from the dock as well as loading containers for deliveries later on. The shunting engine used in this yard is broken and you will have to do the job with your Class 67 engine. Take care of your engine as it is normally not used to do shunting.

- **TaD - Burntisland Shunting Pt. 2**

You will be assembling a consist with the cars you loaded earlier this morning and then taking it to Inverkeithing Goods. Once there you will be doing some yard shunting there. The weather has taken a turn for the bad. A surprise storm has hit and caused an accident on the rails so you will not be seeing any other traffic. Also communication has broken down for now and you will only have your work order (F1) to complete the job! Good luck!

- **TaD - Trains, Planes, and Automobiles**

(Recommended to play at the end of the scenario pack) Summertime, this means holiday, chartered planes and chartered trains as well. You will drive such a chartered holiday train to Penzance. Your passengers are taking their cars with them, so don't forget to pick up the auto carriers at Dundee!

In the unlikely case that you have any problems with the installation or playing the scenario, please refer to the manual of the Versystem-Soundboard and Train Simulator's manual first. If the problem still exists, please contact our support team and give as many information about your problem. Please tell us WHAT you did, WHICH error occurred and WHAT you did to solve the error. If there are any pop-up messages, please let us know, too. If possible, send us a screenshot. This will help us to give you fast and easy support. Thank You!
